**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10 and 18-21, drawn to a dental treatment system comprising dental bracket table, portable base unit, and suspension device, and method; classified in class 433, subclass 77.
  - II. Claims 11-17, drawn to a dental treatment system comprising a portable enclosure; classified in class 433, subclass 80.
2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the portable base unit does not require an enclosure having a panel. The subcombination has separate utility such as housing for surgical equipment, computer devices, or any number of components.
3. Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Invention II, restriction for examination purposes as indicated is proper.

4. Telephone calls were made to Dale Cook on August 1 and 2, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made because the calls were not returned.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
